

**Working with Vinyl - Mini-tutorial for Oct. 27, 2023 via Zoom
Supply List**

At our Oct. 27 Coffee Break (1-3 p.m.), we'll talk about different challenges in working with vinyl, then do a sew-along of the Clear Vinyl Comet Case by Sew Hungry Hippie. Free instructions here:

https://sewhungryhippie.com/blogs/tutorials/how-to-sew-clear-vinyl-bag?_pos=1&_sid=55f518b25&_ss=r

Natalie of Sew Hungry Hippie generously offered to let us post her tips for working with vinyl. See our CQG website: [link here to Coffee Break page]

If you want to sew along with fellow Guild members on Oct. 27, you'll need the following supplies cut to the specifications below:

(2) pieces of clear vinyl 12.5" x 7.5"

(Fine to use clear vinyl of various colors, with glitter, etc.)

(2) pieces of non-directional fabric 12.5" x 6"

(2) pieces of SF101 fusible interfacing 12.5" x 3"

(2) zipper tabs cut from fabric (the non-directional fabric above, for instance) 2 x 3"

#5 size zipper (11" long) if you have it; otherwise, a size 3 zipper (11" long) will work, as well

Size 80 or 90 needle

Thread (I usually use Isacord, since that's what I have on hand for piecing and quilting, and it works fine - so just have on hand your favorite piecing/sewing thread)

(continued)

Plus:

Sewing machine

Wonder clips (for keeping seams in place, since you won't be able to use pins)

Teflon foot for your sewing machine, if you have one

A zipper foot is helpful, too

Tissue paper, if you don't have a Teflon foot (can use the tissue paper instruction strip from the SF101 interfacing)

If you want to add handles to your Comet Case, you can attach webbing or folded-fabric straps.

***You can find good quality vinyl for bag making at SewHungryHippie.com and other sites.

*** We'll walk through making the bag step by step, with plenty of opportunity for you to ask questions.

See you Oct. 27 at the Coffee Break!
